OBJECTIVE

Motivated and adaptable **MERN Stack Developer** seeking to leverage strong problem-solving and coding expertise in developing responsive, efficient, and secure web applications. Committed to continuous learning and delivering high-quality solutions using modern web technologies.

EDUCATION

Bachelor of Computer Science Engineering, GSFC University, Vadodara. CGPA: 7.70 2026

Higher Secondary Certificate (HSC - 12th), Alembic Vidyalaya, Vadodara. Percentage: 56 2022

Secondary School Certificate (SSC - 10th), Alembic Vidyalaya, Vadodara. Percentage: 77 2020

SKILLS

Technical Skills: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, MySQL, MongoDB, React.js, Node.js, Express.js, Next.js

Soft Skills: Time Management, Creativity, Analytical thinking, Problem solving, Team Collaboration, Adaptability

EXPERIENCE

Internships

Intern Nobel Learning PBC | May 2025 – July 2025

- Developed web design, troubleshooting, and internet fundamentals. Strengthened communication, presentation, and idea-pitching skills.
- Gained teamwork, leadership, and mentorship experience. Improved time management and project coordination abilities.

Web Development Intern Pax Immigration | Dec 2025 – May 2026

- Developed the Pax Immigration website from scratch, a full-stack web application for customer services using the MERN stack.
- Contributed to frontend development with React.js, improving UI/UX and performance.
- Collaborated with the backend team to integrate APIs, enhancing functionality and efficiency.

PROJECTS

AI Summarizer & Quiz Generator Platform | Full-Stack Development (Next.js + AI Integration)

Developed a full-stack web application that generates AI-powered summaries and quizzes from PDFs, plain text, and YouTube videos to improve learning efficiency and content accessibility. Built a responsive interface using Next.js and Tailwind CSS, implemented secure authentication with NextAuth.js, and integrated OpenAI API for automated content analysis and quiz generation. Managed user data, generated summaries, and quiz records using MongoDB Atlas to enable personalized learning experiences.

Tech Stack: Next.js, JavaScript, MongoDB Atlas, Tailwind CSS, NextAuth.js, OpenAI API, REST APIs, Git.

TalentScope – AI Interview & Proctoring Platform | Full-Stack AI System Development

Developed an AI-powered interview platform that evaluates candidate responses in real time using a multi-model NLP evaluation system and adaptive questioning. Built a responsive interface with Next.js and Tailwind CSS, implemented secure authentication with Clerk.js, and designed REST APIs with Node.js for interview management and analytics. Integrated Python-based AI services using Hugging Face transformers for semantic answer evaluation, logical reasoning checks, and similarity scoring, while implementing a smart proctoring system with camera monitoring, tab-switch detection, and behavior tracking. Stored interview data, analytics, and proctoring logs in MongoDB to enable performance insights and integrity analysis.

Tech Stack: Next.js, React, Node.js, Python (Flask), Hugging Face Transformers, MongoDB, Tailwind CSS, Clerk.js, REST APIs, NLTK, Pandas, Git.

Project Link: [TalentScope - AI-Powered Interview Platform | Smart Hiring Solutions](#)

Pax Immigration Website | Full-Stack Web Development (MERN + Next.js)

Developed and deployed the official Pax Immigration website using the MERN stack with Next.js (JavaScript-based framework) to create a responsive, SEO-optimized platform for immigration consultancy services. Built scalable frontend components, implemented backend APIs for inquiry management, and optimized performance for faster page loads and improved user engagement.

Tech Stack: React.js, Express.js, Node.js, Next.js, JavaScript, MongoDB, REST APIs, HTML5, CSS3, Git.

SUBSTATE | AI-Powered SaaS Revenue Intelligence & Content Automation Platform (MERN)

Developed a full-stack SaaS platform called SUBSTATE focused on AI-powered content automation, subscription lifecycle management, revenue intelligence, and campaign analytics. Built scalable frontend dashboards and backend service architecture to manage AI article generation, automated campaign workflows, payment processing, customer risk analysis, and WordPress publishing integrations. Implemented secure authentication, Razorpay payment workflows, cron-based automation, analytics tracking, and modular API-driven architecture for production-level scalability and maintainability.

Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript, Tailwind CSS, Zustand, TanStack Query, Framer Motion, OpenAI API, Razorpay API, WordPress REST API, Node-Cron, JWT Authentication, REST APIs, HTML5, CSS3, Git, Vercel.
